

§ 1794.51 Preparation for scoping.

(a) As soon as practicable after RUS and the applicant have developed a schedule for the environmental review process, RUS shall have its notice of intent to prepare an EA or EIS and schedule scoping meetings (§ 1794.13) published in the **Federal Register** (see 40 CFR 1508.22). The applicant shall have published, in a timely manner, a notice similar to RUS' notice.

* * * * *

14. Section 1794.52(d) is amended by removing the last sentence and adding a new sentence at the end of the paragraph to read as follows:

§ 1794.52 Scoping meetings.

* * * * *

(d) * * * The applicant or its consultant shall prepare a record of the scoping meeting. The record shall consist of a transcript when a traditional meeting format is used or a summary report when an open house format is used.

* * * * *

15. Section 1794.53 is revised to read as follows:

§ 1794.53 Environmental report.

(a) After scoping procedures have been completed, RUS shall require the applicant to develop and submit an ER. The ER shall be prepared under the supervision and guidance of RUS staff and RUS shall evaluate and be responsible for the accuracy of all information contained therein.

(b) The applicant's ER will normally serve as the RUS EA. After RUS has reviewed and found the ER to be satisfactory, the applicant shall provide RUS with a sufficient number of copies of the ER to satisfy the RUS distribution plan.

(c) The ER shall include a summary of the construction and operation monitoring and mitigation measures for the proposed action. These measures may be revised as appropriate in response to comments and other information, and shall be incorporated by summary or reference into the FONSI.

16. Section 1794.54 is revised to read as follows:

§ 1794.54 Agency determination.

Following the scoping process and the development of a satisfactory ER by the applicant or its consultant that will serve as the agency's EA, RUS shall determine whether the proposed action is a major Federal action significantly affecting the quality of the human environment. If RUS determines the action is significant, RUS will continue with the procedures in subpart G of this

part. If RUS determines the action is not significant, RUS will proceed in accordance with §§ 1794.42 through 1794.44, except that RUS shall have a notice published in the **Federal Register** that announces the availability of the EA and FONSI.

§ 1794.61 [Amended]

17. Section 1794.61 is amended by:

A. Removing paragraph (b).

B. Redesignating paragraph (a) as the introductory text; paragraph (a)(1) as (a); paragraph (a)(2) as (b); and paragraph (a)(3) as (c).

Dated: December 24, 2002.

Blaine D. Stockton,

Acting Administrator, Rural Utilities Service.

RIN 2040-AB74

Advance Notice of Proposed Rulemaking on the Clean Water Act Regulatory Definition of "Waters of the United States"

AGENCIES: U.S. Army Corps of Engineers, Department of the Army, DOD; and Environmental Protection Agency.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The U.S. Army Corps of Engineers (Corps) and the Environmental Protection Agency (EPA) are today issuing an advance notice of proposed rulemaking (ANPRM) in order to obtain early comment on issues associated with the scope of waters that are subject to the Clean Water Act (CWA), in light of the U.S. Supreme Court decision in *Solid Waste Agency of Northern Cook County v. U.S. Army Corps of Engineers*, 531 U.S. 159 (2001) (*SWANCC*).

Today's ANPRM requests public input on issues associated with the definition of "waters of the United States" and also solicits information or data from the general public, the scientific community, and Federal and

State resource agencies on the implications of the *SWANCC* decision for jurisdictional decisions under the CWA. The goal of the agencies is to develop proposed regulations that will further the public interest by clarifying what waters are subject to CWA jurisdiction and affording full protection to these waters through an appropriate focus of Federal and State resources consistent with the CWA. The input received from the public in response to today's ANPRM will be used by the agencies to determine the issues to be addressed and the substantive approach for a future proposed rulemaking addressing the scope of CWA jurisdiction.

Pending this rulemaking, should questions arise, the regulated community should seek assistance from the Corps and EPA, in accordance with the joint memorandum attached as Appendix A.

DATES: In order to be considered, comments or information in response to this ANPRM must be postmarked or e-mailed on or before March 3, 2003.

ADDRESSES: Comments may be submitted electronically, by mail, or through hand delivery/courier. Mail comments to: Water Docket, Environmental Protection Agency, Mailcode 4101T, 1200 Pennsylvania Ave., NW., Washington, DC 20460, Attention Docket ID No. OW-2002-0050.

FOR FURTHER INFORMATION CONTACT: For information on this ANPRM, contact either Donna Downing, U.S. Environmental Protection Agency, Office of Wetlands, Oceans and Watersheds (4502T), 1200 Pennsylvania Avenue N.W., Washington, DC 20460, phone: (202) 566-1366, e-mail: CWAwaters@epa.gov, or Ted Rugiel, U.S. Army Corps of Engineers, ATTN CECW-OR, 441 G Street NW., Washington, DC 20314-1000, phone: (202) 761-4595, e-mail: Thaddeus.J.Rugiel@HQ02.USACE.ARMY.MIL.

SUPPLEMENTARY INFORMATION:**I. General Information****A. Potentially Regulated Entities**

Persons or entities that discharge pollutants (including dredged or fill material) to "waters of the U.S." could be regulated by a rulemaking based on this ANPRM. The CWA generally prohibits the discharge of pollutants into "waters of the U.S." without a permit issued by EPA or a State or Tribe approved by EPA under section 402 of the Act, or, in the case of dredged or fill material, by the Corps or an approved

State or Tribe under section 404 of the Act. In addition, under the CWA, States or approved Tribes establish water quality standards for “waters of the U.S.”, and also may assume responsibility for issuance of CWA permits for discharges into waters and wetlands subject to the Act. Today’s ANPRM seeks public input on what, if any, revisions in light of SWANCC might be appropriate to the regulations that define “waters of the U.S.”, and today’s ANPRM thus would be of interest to all entities discharging to, or regulating, such waters. In addition, because the Oil Pollution Act (OPA) is applicable to waters and wetlands subject to the CWA, today’s ANPRM may have implications for persons or entities subject to the OPA. Examples of entities potentially regulated include:

Category	Examples of potentially regulated entities
State/Tribal governments or instrumentalities.	State/Tribal agencies or instrumentalities that discharge or spill pollutants into waters of the U.S.
Local governments or instrumentalities.	Local governments or instrumentalities that discharge or spill pollutants into waters of the U.S.
Federal government agencies or instrumentalities.	Federal government agencies or instrumentalities that discharge or spill pollutants into waters of the U.S.
Industrial, commercial, or agricultural entities.	Industrial, commercial, or agricultural entities that discharge or spill pollutants into waters of the U.S.
Land developers and landowners.	Land developers and landowners that discharge or spill pollutants into waters of the U.S.

This table is not intended to be exhaustive, but rather provides a guide for readers regarding entities that are likely to be regulated by a rulemaking based on this ANPRM. This table lists the types of entities that we are now aware of that could potentially be regulated. Other types of entities not listed in the table could also be regulated. To determine whether your organization or its activities could be regulated, you should carefully examine the discussion in this ANPRM. If you have questions regarding the applicability of this action to a particular entity, consult one of the persons listed in the preceding **FOR FURTHER INFORMATION CONTACT** section.

B. How Can I Get Copies of This Document and Other Related Information?

1. *Docket.* The agencies have established an official public docket for this action under Docket ID No. OW-2002-0050. The official public docket consists of the documents specifically referenced in this ANPRM, any public comments received, and other information related to this ANPRM. Although a part of the official docket, the public docket does not include Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. The official public docket is the collection of materials that is available for public viewing at the Water Docket in the EPA Docket Center, (EPA/DC) EPA West, Room B102, 1301 Constitution Ave., NW., Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566-1744, and the telephone number for the Water Docket is (202) 566-2426. You may have to pay a reasonable fee for copying.

2. *Electronic Access.* You may access this Federal Register document electronically through the EPA Internet under the Federal Register listings at <http://www.epa.gov/fedrgstr/>.

An electronic version of the public docket is available through EPA’s electronic public docket and comment system, EPA Dockets. You may use EPA Dockets at <http://www.epa.gov/edocket> to submit or view public comments, access the index listing of the contents of the official public docket, and to access those documents in the public docket that are available electronically. Once in the system, select search, then key in the appropriate docket identification number.

Certain types of information will not be placed in the EPA Dockets. Information claimed as CBI and other information whose disclosure is restricted by statute, which is not included in the official public docket, will not be available for public viewing in EPA’s electronic public docket. EPA’s policy is that copyrighted material will not be placed in EPA’s electronic public docket but will be available only in printed, paper form in the official public docket. Although not all docket materials may be available electronically, you may still access any of the publicly available docket materials through the docket facility identified in I.B.1.

For those who submit public comments, it is important to note that

EPA’s policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing in EPA’s electronic public docket as EPA receives them and without change, unless the comment contains copyrighted material, CBI, or other information whose disclosure is restricted by statute. When EPA identifies a comment containing copyrighted material, EPA will provide a reference to that material in the version of the comment that is placed in EPA’s electronic public docket. The entire printed comment, including the copyrighted material, will be available in the public docket.

Public comments submitted on computer disks that are mailed or delivered to the docket will be transferred to EPA’s electronic public docket. Public comments that are mailed or delivered to the Docket will be scanned and placed in EPA’s electronic public docket. Where practical, physical objects will be photographed, and the photograph will be placed in EPA’s electronic public docket along with a brief description written by the docket staff.

C. How and To Whom Do I Submit Comments?

You may submit comments electronically, by mail, or through hand delivery/courier. To ensure proper receipt by EPA, identify the appropriate docket identification number (OW-2002-0050) in the subject line on the first page of your comment. Please ensure that your comments are submitted within the specified comment period. Comments received after the close of the comment period will be marked late. The agencies are not required to consider these late comments.

1. *Electronically.* If you submit an electronic comment as prescribed below, EPA recommends that you include your name, mailing address, and an e-mail address or other contact information in the body of your comment. Also include this contact information on the outside of any disk or CD ROM you submit, and in any cover letter accompanying the disk or CD ROM. This ensures that you can be identified as the submitter of the comment and allows EPA to contact you in case EPA cannot read your comment due to technical difficulties or needs further information on the substance of your comment. EPA’s policy is that EPA will not edit your comment, and any identifying or contact information provided in the body of a comment will be included as part of the comment that is placed in the official public docket,

and made available in EPA's electronic public docket. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, the agencies may not be able to consider your comment.

i. *EPA Dockets.* Your use of EPA's electronic public docket to submit comments to EPA electronically is EPA's preferred method for receiving comments. Go directly to EPA Dockets at <http://www.epa.gov/edocket>, and follow the online instructions for submitting comments. Once in the system, select search, and then key in Docket ID No. OW-2002-0050. The system is an anonymous access system, which means EPA will not know your identity, e-mail address, or other contact information unless you provide it in the body of your comment.

ii. *E-mail.* Comments may be sent by electronic mail (e-mail) to CWAwaters@epa.gov, Attention Docket ID No. OW-2002-0050. In contrast to EPA's electronic public docket, EPA's e-mail system is not an anonymous access system. If you send an e-mail comment directly to the Docket without going through EPA's electronic public docket, EPA's e-mail system automatically captures your e-mail address. E-mail addresses that are automatically captured by EPA's e-mail system are included as part of the comment that is placed in the official public docket, and made available in EPA's electronic public docket.

iii. *Disk or CD ROM.* You may submit comments on a disk or CD ROM that you mail to the mailing address identified in I.C.2. These electronic submissions will be accepted in WordPerfect or ASCII file format. Avoid the use of special characters and any form of encryption.

2. *By Mail.* Send four copies of your comments to: Water Docket, Environmental Protection Agency, Mailcode 4101T, 1200 Pennsylvania Ave., NW, Washington, DC 20460, Attention Docket ID No. OW-2002-0050.

3. *By Hand Delivery or Courier.* Deliver your comments to: Water Docket, EPA Docket Center, EPA West, Room B102, 1301 Constitution Avenue, NW, Washington, DC, Attention Docket ID No. OW-2002-0050. Such deliveries are only accepted during the Docket's normal hours of operation as identified in I.B.1.

D. What Should I Consider as I Prepare My Comments?

You may find the following suggestions helpful for preparing your comments:

- a. Explain your views as clearly as possible.
- b. Describe any assumptions that you used.
- c. Provide any technical information and/or data on which you based your views.
- d. If you estimate potential burden or costs, explain how you arrived at your estimate.
- e. Provide specific examples to illustrate your concerns.
- f. Offer alternatives.
- g. Make sure to submit your comments by the comment period deadline identified.
- h. To ensure proper receipt by EPA, identify the appropriate docket identification number in the subject line on the first page of your response. It would also be helpful if you provided the name, date, and **Federal Register** citation related to your comments.

II. The Importance of Updating the Regulations

The agencies have not engaged in a review of the regulations with the public concerning CWA jurisdiction for some time. This ANPRM will help ensure that the regulations are consistent with the CWA and the public understands what waters are subject to CWA jurisdiction. The goal of the agencies is to develop proposed regulations that will further the public interest by clarifying what waters are subject to CWA jurisdiction and affording full protection to these waters through an appropriate focus of Federal and State resources consistent with the CWA. It is appropriate to review the regulations to ensure that they are consistent with the *SWANCC* decision. *SWANCC* eliminates CWA jurisdiction over isolated waters that are intrastate and non-navigable, where the sole basis for asserting CWA jurisdiction is the actual or potential use of the waters as habitat for migratory birds that cross State lines in their migrations. *SWANCC* also calls into question whether CWA jurisdiction over isolated, intrastate, non-navigable waters could now be predicated on the other factors listed in the "Migratory Bird Rule" or the other rationales of 33 CFR 328.3(a)(3)(i)-(iii).

Although the *SWANCC* case itself specifically involves section 404 of the CWA, the Court's decision may also affect the scope of regulatory jurisdiction under other provisions of the CWA, including programs under sections 303, 311, 401, and 402. Under each of these sections, the relevant agencies have jurisdiction over "waters of the United States." The agencies will consider the potential implications of the rulemaking for these other sections.

- *Section 404 dredged and fill material permit program.* This program establishes a permitting system to regulate discharges of dredged or fill material into waters of the United States.

- *Section 303 water quality standards program.* Under this program, States and authorized Indian Tribes establish water quality standards for navigable waters to "protect the public health or welfare" and "enhance the quality of water", "taking into consideration their use and value for public water supplies, propagation of fish and wildlife, recreational purposes, and agriculture, industrial, and other purposes, and also taking into consideration their use and value for navigation."

- *Section 311 spill program and the Oil Pollution Act (OPA).* Section 311 of the CWA addresses pollution from both oil and hazardous substance releases. Together with the Oil Pollution Act, it provides EPA and the U.S. Coast Guard with the authority to establish a program for preventing, preparing for, and responding to spills that occur in navigable waters of the United States.

- *Section 401 State water-quality certification program.* Section 401 provides that no Federal permit or license for activities that might result in a discharge to navigable waters may be issued unless a section 401 water-quality certification is obtained from or waived by States or authorized Tribes.

- *Section 402 National Pollutant Discharge Elimination System (NPDES) permitting program.* This program establishes a permitting system to regulate point source discharges of pollutants (other than dredged or fill material) into waters of the United States.

III. Legislative and Regulatory Context

The Federal Water Pollution Control Act Amendments, now known as the Clean Water Act (CWA), was enacted in 1972. In the years since its enactment, the scope of waters regulated under the CWA has been discussed in regulations, legislation, and judicial decisions.

The CWA was intended to "restore and maintain the chemical, physical, and biological integrity of the Nation's waters." 33 U.S.C. 1251(a). Its specific provisions were designed to improve upon the protection of the Nation's waters provided under earlier statutory schemes such as the Rivers and Harbors Act of 1899 ("RHA") (33 U.S.C. 403, 407, 411) and the Federal Water Pollution Control Act of 1948 (62 Stat. 1155) and its subsequent amendments through 1970. In doing so, Congress recognized "the primary responsibilities and rights of States to prevent, reduce,

and eliminate pollution, to plan the development and use (including restoration, preservation, and enhancement) of land and water resources * * * 33 U.S.C. 1251(b).

The jurisdictional scope of the CWA is "navigable waters," defined in the statute as "waters of the United States, including the territorial seas." CWA section 502(7), 33 U.S.C. 1362(7). The existing CWA section 404 regulations define "waters of the United States" as follows:

(1) All waters which are currently used, or were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters which are subject to ebb and flow of the tide;

(2) All interstate waters including interstate wetlands;

(3) All other waters such as intrastate lakes, rivers, streams (including intermittent streams), mudflats, sandflats, wetlands, sloughs, prairie potholes, wet meadows, playa lakes, or natural ponds, the use, degradation or destruction of which could affect interstate or foreign commerce including any such waters:

(i) which are or could be used by interstate or foreign travelers for recreational or other purposes; or

(ii) from which fish or shellfish are or could be taken and sold in interstate or foreign commerce; or

(iii) which are used or could be used for industrial purposes by industries in interstate commerce.

(4) All impoundments of waters otherwise defined as waters of the United States under the definition;

(5) Tributaries of waters identified in paragraphs (a)(1)–(4) of this section;

(6) The territorial seas;

(7) Wetlands adjacent to waters (other than waters that are themselves wetlands) identified in paragraphs (a)(1)–(6) of this section.

(8) Waters of the United States do not include prior converted cropland ... Waste treatment systems, including treatment ponds or lagoons designed to meet the requirements of CWA (other than cooling ponds ...) are not waters of the United States. 40 CFR.230.3(s); 33 CFR 328.3(a).

Counterpart and substantively similar regulatory definitions appear at 40 CFR 110.1, 112.2, 116.3, 117.1, 122.2, 232.2, 300.5, part 300 App. E, 302.3 and 401.11 (hereafter referred to as "the counterpart definitions").

In regulatory preambles, both the Corps and EPA provided examples of additional types of links to interstate commerce which might serve as a basis under 40 CFR 230.3(a)(3) and 33 CFR 328.3(a)(3) for establishing CWA

jurisdiction over intrastate waters which were not part of the tributary system or their adjacent wetlands. These included use of waters (1) as habitat by birds protected by Migratory Bird Treaties or which cross State lines, (2) as habitat for endangered species, or (3) to irrigate crops sold in commerce. 51 FR 41217 (November 13, 1986), 53 FR 20765 (June 6, 1988). These examples became known as the "Migratory Bird Rule," even though the examples were neither a rule nor entirely about birds. The Migratory Bird Rule later became the focus of the SWANCC case.

IV. Potential Natural Resource Implications

To date, some quantitative studies and anecdotal data provide early estimates of potential resource implications of the SWANCC decision. One of the purposes of the ANPRM is to solicit additional information, data, or studies addressing the extent of resource impacts to isolated, intrastate, non-navigable waters.

Non-navigable intrastate isolated waters occur throughout the country. Their extent depends on a variety of factors including topography, climate, and hydrologic forces. Preliminary assessments of potential resource impacts vary widely depending on the scenarios considered. See, *e.g.*, Ducks Unlimited, "The SWANCC Decision: Implications for Wetlands and Waterfowl" (September 2001) (available at http://www.ducks.org/conservation/404_report.asp); ASWM, "SWANCC Decision and the State Regulation of Wetlands," (June 2001) (available at <http://www.aswm.org>).

There is an extensive body of knowledge about the functions and values of wetlands, which include flood risk reduction, water quality improvement, fish and wildlife habitat, and maintenance of the hydrologic integrity of aquatic ecosystems. The ANPRM seeks information regarding the functions and values of wetlands and other waters that may be affected by the issues discussed in this ANPRM.

V. Solicitation of Comments

The agencies are seeking comment on issues related to the jurisdictional status of isolated waters under the CWA which the public wishes to call to our attention. To assist the public in considering these issues, the following discussion and specific questions are presented. The agencies will carefully consider the responses received to this ANPRM in determining what regulatory changes may be appropriate and the issues to be addressed in a proposed rulemaking to clarify CWA jurisdiction.

The SWANCC holding eliminates CWA jurisdiction over isolated, intrastate, non-navigable waters where the sole basis for asserting CWA jurisdiction is the actual or potential use of the waters as habitat for migratory birds that cross State lines in their migrations. 531 U.S. at 174 ("We hold that 33 CFR 328.3(a)(3) (1999), as clarified and applied to petitioner's balefill site pursuant to the "Migratory Bird Rule," 51 FR 41217 (1986), exceeds the authority granted to respondents under section 404(a) of the CWA."). The agencies seek comment on the use of the factors in 33 CFR 328.3(a)(3)(i)–(iii) or the counterpart regulations in determining CWA jurisdiction over isolated, intrastate, non-navigable waters.

The agencies solicit comment from the public on the following issues:

(1) Whether, and, if so, under what circumstances, the factors listed in 33 CFR 328.3(a)(3)(i)–(iii) (*i.e.*, use of the water by interstate or foreign travelers for recreational or other purposes, the presence of fish or shellfish that could be taken and sold in interstate commerce, the use of the water for industrial purposes by industries in interstate commerce) or any other factors provide a basis for determining CWA jurisdiction over isolated, intrastate, non-navigable waters?

(2) Whether the regulations should define "isolated waters," and if so, what factors should be considered in determining whether a water is or is not isolated for jurisdictional purposes?

Solicitation of Information

In answering the questions set forth above, please provide, as appropriate, any information (*e.g.*, scientific and technical studies and data, analysis of environmental impacts, effects on interstate commerce, other impacts, etc.) supporting your views, and specific recommendations on how to implement such views. Additionally, we invite your views as to whether any other revisions are needed to the existing regulations on which waters are jurisdictional under the CWA. As noted elsewhere in this document, the agencies are also soliciting data and information on the availability and effectiveness of other Federal or State programs for the protection of aquatic resources, and on the functions and values of wetlands and other waters that may be affected by the issues discussed in this ANPRM.

VI. Related Federal and State Authorities

The SWANCC decision addresses CWA jurisdiction, and other Federal or

State laws and programs may still protect a water and related ecosystem even if that water is no longer jurisdictional under the CWA following SWANCC. The Federal government remains committed to wetlands protection through the Food Security Act's Swampbuster requirements and Federal agricultural program benefits and restoration through such Federal programs as the Wetlands Reserve Program (administered by the U.S. Department of Agriculture), grant making programs such as Partners in Wildlife (administered by the Fish and Wildlife Service), the Coastal Wetlands Restoration Program (administered by the National Marine Fisheries Service), the State Grant, Five Star Restoration, and National Estuary Programs (administered by EPA), and the Migratory Bird Conservation Commission (composed of the Secretaries of Interior and Agriculture, the Administrator of EPA and Members of Congress).

The SWANCC decision also highlights the role of States in protecting waters not addressed by Federal law. Prior to SWANCC, fifteen States had programs that addressed isolated wetlands. Since SWANCC, additional States have considered, and two have adopted, legislation to protect isolated waters. The Federal agencies have a number of initiatives to assist States in these efforts to protect wetlands. For example, EPA's Wetland Program Development Grants are available to assist States, Tribes, and local governments for building their wetland program capacities. In addition, the U.S. Department of Justice and other Federal agencies co-sponsored a national wetlands conference with the National Governors Association Center for Best Practices, National Conference of State Legislatures, the Association of State Wetlands Managers, and the National Association of Attorneys General. This conference and the dialogue that has ensued will promote close collaboration between Federal agencies and States in developing, implementing, and enforcing wetlands protection programs. EPA also is providing funding to the National Governors Association Center for Best Practices to assist States in developing appropriate policies and actions to protect intrastate isolated waters.

In light of this, the agencies solicit information and data from the general public, the scientific community, and Federal and State resource agencies on the availability and effectiveness of other Federal or State programs for the protection of aquatic resources and practical experience with their implementation. The agencies are also

interested in data and comments from State and local agencies on the effect of no longer asserting jurisdiction over some of the waters (and discharges to those waters) in a watershed on the implementation of Total Maximum Daily Loads (TMDLs) and attainment of water quality standards.

VII. Statutory and Executive Order Reviews

A. Executive Order 12866

Under Executive Order 12866 (58 FR 51735, October 4, 1993), EPA and the Corps must determine whether the regulatory action is "significant" and therefore subject to review by the Office of Management and Budget (OMB) and the requirements of the Executive Order. The Order defines "significant regulatory action" as one that is likely to result in a rule that may:

- (1) Have an annual effect on the economy of \$100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or Tribal governments or communities;
- (2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;
- (3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or
- (4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

Pursuant to the terms of Executive Order 12866, it has been determined that this Advanced Notice of Proposed Rulemaking is a "significant regulatory action" in light of the provisions of paragraph (4) above as it raises novel legal or policy issues. As such, this action was submitted to OMB for review. Changes made in response to OMB suggestions or recommendations will be documented in the public record.

B. National Environmental Policy Act

As required by the National Environmental Policy Act (NEPA), the Corps prepares appropriate environmental documentation for its activities affecting the quality of the human environment. The Corps has determined that today's Advance Notice of Proposed Rulemaking merely solicits early comment on issues associated with the scope of waters that are properly subject to the CWA, and information or data from the general public, the scientific community, and

Federal and State resource agencies on the implications of the SWANCC decision for the protection of aquatic resources. In light of this, the Corps has determined that today's ANPRM does not constitute a major Federal action significantly affecting the quality of the human environment, and thus does not require the preparation of an Environmental Impact Statement (EIS).

Dated: January 10, 2003.

Christine Todd Whitman,
Administrator, Environmental Protection Agency.

Dated: January 10, 2003.

R.L. Brownlee,
Acting Assistant Secretary of the Army, (Civil Works), Department of the Army.

Note: The following guidance document will not appear in the Code of Federal Regulations.

Appendix A

Joint Memorandum

Introduction

This document provides clarifying guidance regarding the Supreme Court's decision in *Solid Waste Agency of Northern Cook County v. United States Army Corps of Engineers*, 531 U.S. 159 (2001) ("SWANCC") and addresses several legal issues concerning Clean Water Act ("CWA") jurisdiction that have arisen since SWANCC in various factual scenarios involving federal regulation of "navigable waters." Because the case law interpreting SWANCC has developed over the last two years, the Agencies are issuing this updated guidance, which supersedes prior guidance on this issue. The Corps and EPA are also initiating a rulemaking process to collect information and to consider jurisdictional issues as set forth in the attached ANPRM. Jurisdictional decisions will be based on Supreme Court cases including *United States v. Riverside Bayview Homes*, 474 U.S. 121 (1985) and SWANCC, regulations, and applicable case law in each jurisdiction.

Background

In SWANCC, the Supreme Court held that the Army Corps of Engineers had exceeded its authority in asserting CWA jurisdiction pursuant to section 404(a) over isolated, intrastate, non-navigable waters under 33 C.F.R. 328.3(a)(3), based on their use as habitat for migratory birds pursuant to preamble language commonly referred to as the "Migratory Bird Rule," 51 FR 41217 (1986). "Navigable waters" are defined in section 502 of the CWA to mean "waters of the United States, including the territorial seas." In SWANCC, the Court determined that the term "navigable" had significance in indicating the authority Congress intended to exercise in asserting CWA jurisdiction. 531 U.S. at 172. After reviewing the jurisdictional scope of the statutory definition of "navigable waters" in section 502, the Court concluded that neither the text of the statute nor its legislative history supported the
